

Concealed functionality
for the utmost individuality
in drawer design.

DYNAPRO SLIDE SYSTEM

reddot design award
winner 2010

**High load capacity. Synchronised movement.
3D adjustment. The multitude of special qualities makes
Dynapro a unique movement system for individualists.**

If you prefer unusual design and expect a concealed drawer slide to offer excellent running performance, high stability, precision and exceptional operating comfort - then Dynapro is exactly right for you. Handle-free surfaces, high fronts, wide drawers or unusual materials - the new generation of slides for full drawer extension offers unlimited design possibilities. Because Dynapro is the first concealed slide system worldwide with an integrated, three-dimensional adjustment facility. The entire drawer can be adjusted vertically and horizontally as well as in its tilt angle.

Dynapro – the powerful precision slide
for absolute design freedom.

Neat, practical, versatile and flexible.
GRASS dividing and organising systems
don't just look good, they make life
easier and help to keep drawer
contents tidy.

DYNAPRO SLIDE SYSTEM

Whether you are dealing with wood, aluminium, glass, natural stone or concrete – let Dynapro provide the inspiration for new ideas.

Innovating means adopting new approaches. That applies just as much to the creation of new furniture designs as it does to the development of new movement systems. The more offbeat the idea, the more vital it becomes to have intelligent function characteristics. To cater for even the most exceptional requirements, GRASS has developed a completely new slide system that combines concealed functionality and outstanding running performance. For furniture designers, this opens up entirely new perspectives.

Synchronisation for excellent running characteristics.

Unlike conventional concealed slide systems, Dynapro is the only fitting worldwide that features a synchronisation mechanism. Even under high load, the excellent running performance of Dynapro remains unchanged. Load forces of up to 60 kg present no problem for the system. Abrasion-resistant plastic rollers ensure a smooth, even glide every time.

Three options for the utmost in operating comfort.

Soft-close, the successful damping system, closes Dynapro drawers gently and quietly. With Tipmatic Plus, the mechanical opening system, it is possible to operate large handle-free fronts which will open with a gentle tap. And with Sensomatic, the electro-mechanical opening system, Dynapro drawers open as if by magic. In combination with these extraordinary comfort systems, Dynapro guarantees a maximum of functional versatility.

Three dimensions for perfect alignment.

With Dynapro we have succeeded for the first time in applying 3D adjustment - which has long been the standard for double-wall drawer systems - to a concealed slide system. Dynapro offers height, side and front tilt adjustment. All adjustments are tool-free, readily accessible and easy to handle. In short, it takes just a few tweaks to achieve optimal alignment.
